

How to drive to the Brattvall Range

The Brattvall Range is located 30 km north of Umeå, off road 363. Look for the sign marked JAKTSKYTTEBANA on the right hand side of the road (driving north from Umeå). On the other side there will be a sign marked Rödåsel.

GPS coordinates of the Brattvall Range: Latitude 64,06451 Longitude 19,99443

At this website, www.benchrest.se, you also will find a very useable map to your help. Look for Klubbar/Brattvall/Karta and zoom in.

Descriptions of how to drive:

If you are driving from the south, on the E4 or from Umeå City Airport, you take the E4 over the river and through the central parts of Umeå. After a short distance you will find yourself on a viaduct over the E12 and railway. While you are still at the viaduct turn right, and keep right, to take the road going under the viaduct. You are now on road 363 going all the way to the range and further to Vindeln, Hällnäs etc.

If you are driving the E4 from north you take the second exit in the third roundabout, when approaching Umeå, leading you to road 363.

If you are driving the E12 from west there are a couple of shortcuts to the road 363. One 13km from Lycksele to Strycksele and Hällnäs and another one 7km from Granö to Vindeln. If you are going all the way down to Umeå, take the third exit in the first roundabout leading you to road 363.

If you drive road 45, Inlandsvägen, take road 92 in Dorotea down to Umeå.
